

Programs using conditional statements :

Question 1 :

An organisation offers the following discounts to its customers based on the amount of money spent by the customers. Input the name of the customer and the amount of money spent by the customer. Accordingly, print the name, and the new amount to be paid.

Amount	Discount (in %)
Above ₹10,000	30%
₹5,000 to ₹10,000	15%
₹1,000 to ₹5,000	5%
Below ₹1,000	No discount

Question 2 :

As shown in the table, a fair has different ticket prices for different ages. Take the age of the person as input and display the ticket price.

Age (in years)	Cost of ticket (in ₹)
Lesser than 10	10
10 to 20	20
20 to 50	50
50 to 70	100
Above 70	120

Question 3 :

A telephone company charges different amounts depending on the number of call hours. Take the number of call hours as input and calculate the final amount charged using the following table.

Number of hours	Cost per hour (in ₹)
First 100 hours	4
Next 200 hours	10
Above 300 hours	15

Question 4 :

A teacher wants to print whether a student got “distinction”, “honours”, “pass”, or “fail” in a hundred marks examination depending on the student’s marks. Take the student’s marks and name as input. Display the student’s name and their title using the following information.

Marks	Title
Less than 30	“fail”
Between 30 and 60	“pass”
Between 60 and 80	“pass with honours”
Greater than 80	“pass with distinction”
