

Converting between loops :

Question 1 :

Convert the following loop into a do - while loop

```
int x = 0;
while(x < 8){
    sum = x + (x % 3);
}
System.out.println(sum);
```

Question 2 :

Convert the following loop into a do - while loop

```
int temp = 0;
int check = 20;
for(int i=1; i<30; i++){
    temp = temp + (i + i + 1);
    check = check + (i)
}
System.out.println(temp*check);
```

Question 3 :

Convert the following loop into a do - while loop

```
int x = 1;
int y = 15;
do {
    x = x*y;
    y ++;

}
while(y<20);
System.out.println(x);
```
