

Arrays - Practice questions

Evaluate the following :

1. To access the 6th element of the array, what index number would I use.
2. Write a Java statement to create and initialise an int array with the elements 3, 5, 8, 10, 13
3. Surya made an array and used the java statement
`System.out.println(x[x.length])`
What type of error did the statement cause?
4. An array `newArr` was defined with the elements {2, 15, 16, 22, 101}. What is the value of `newArr[newArr.length-1] + newArr[0]`
5. A string array `arr` stored the following elements:
`String [ ] arr = {"Physics" , "Chemistry", "Maths"};`
What is the index of "Chemistry" in the array?

Evaluate the following :

1. Find the index of the smallest and the largest elements for the following array:
`int [ ] a = {1,2,5,88,13,-15,-11};`
2. Teja wrote a Java statement to declare a boolean array with five elements.
`boolean [ ] k = new boolean [10].`
What is the output of this `println` statement?
`System.out.println(k[3] + " " k[5])`
3. What is the size of an array which stores 10 elements of the int data type.
4. If an array of the char data type has 37 elements. What is the total size of the array?
