

Pattern Programs :

Question 1 :

Write a program to print the following pattern

```
1
1 2
1 2 3
1 2 3 4
1 2 3 4 5
1 2 3 4 5 6
```

Question 2 :

Write a program to print the following pattern till an nth row. Take n as input from the user. If n is five, the program should print five rows. If n is 10, the program should print 10 rows.

```
*
* *
* * *
* * * *
* * * * *
* * * * *
* * * * *
.
```

Till the n^{th} row

Question 3 :

Write a program to print the following pattern till the n th row. Take n as input from the user. If n is 5, print five rows. If n is 8, print eight rows.

```
1
2 3
4 5 6
7 8 9 10
:
Till the  $n^{th}$  row
```

Question 4 :

Write a program to print the following pattern for the first 10 rows

The output for the first four rows would look like this:

```
4 3 2 1
3 2 1
2 1
1
```

Question 5 :

Write a program to print the following pattern for the first 20 rows

The output for the first six rows would look like this:

```
1
1 0
1 0 1
1 0 1 0
1 0 1 0 1
1 0 1 0 1 0
```

Question 6 :

Write a program to print the following pattern till an n th row. Take n as input from the user.

If n is 5, the output would be:

```
*
* * *
* * * * *
* * * * * * *
* * * * * * * *
.
.
.
```

Till the n^{th} row

Question 7 :

Write a Java program to display the following pattern for the first 10 rows.

The pattern for the first four rows would be:

```
2
4 4
8 8 8
16 16 16 16
```

Question 8 :

Write a Java program to display the following pattern

```
# @ # @ # @
# @ # @ #
# @ # @
# @ #
# @
#
```
